

Quality Regulatory Manager (m/f/x)

Mannheim or Zurich. Full-time or part-time

Pathmate is a digital health startup with locations in Mannheim and in Zurich. We develop digital health coaches (chatbots) for chronic diseases such as hypertension or diabetes type 2. We are an ETH Zurich and University of St. Gallen Spinoff and build on several years of research at the Center for Digital Health Interventions (www.c4dhi.org).

Pathmate is a team of health psychologists, developers, and data scientists on a path to make its digital coaches more and personalized that they feel like a real personal coach for our users.

Check our homepage and short video that shows what we are doing.

What we offer

Join us in our mission and become a key part of the Pathmate team:

- + Benefit from an interdisciplinary team of developers, psychologists, product owners, designers, and data scientists. Answer relevant research questions in a team. Be part of a solution for making the lives of many chronic care patients better.
- + Work in an open-minded and agile startup environment. Take responsibility early on and experience a steep learning curve.
- + Expect to have interesting, multifaceted tasks and great options for personal development and advancement.
- + Competitive salary and good working atmosphere.
- + Be part of a solution for making the lives of many chronic care patients better.

What we are looking for (profile and skills)

- + Degree in medical, IT, engineering or similar
- + Strong analytical skillset with focus on process oriented working attitude. Quality management experience in medical or a similar process driven industry (e.g. ISO 13485).
- + Responsible for compliance with legislation related to medical device manufacturing and data protection laws.
- + Establish, implement and maintain a state-of-the-art quality management system (QMS) according to ISO 13485, MDR IIa and other international standards in the future.
- + Passionate about healthcare innovation. Open-minded attitude to working in a virtual and fast paced environment.
- + Prepare and conduct internal and external regulatory audits as well as supplier audits as needed.
- + Good communication and interpersonal skills for working in a multicultural work environment, including a good level of English and German in spoken and written.
